## TMR2905

Ultra High Sensitivity TMR linear sensor

## General Description

The TMR2905 linear sensor utilizes a unique push-pull Wheatstone bridge composed of four unshielded TMR sensor elements. The unique bridge design provides a high sensitivity differential output that is linearly proportional to a magnetic field applied parallel to the surface of the sensor package, and it provides superior temperature compensation of the output. The TMR2905 is packaged in $6 \mathrm{~mm} \times 5 \mathrm{~mm} \times 1.5 \mathrm{~mm}$ SOP8 named TMR2905P, and packaged in3mmX3mmX0.75mm DFN8 named TMR2905D.

## Features and Benefits

- Tunneling Magneto resistance (TMR) Technology
